

Regenerative Medical Aesthetics

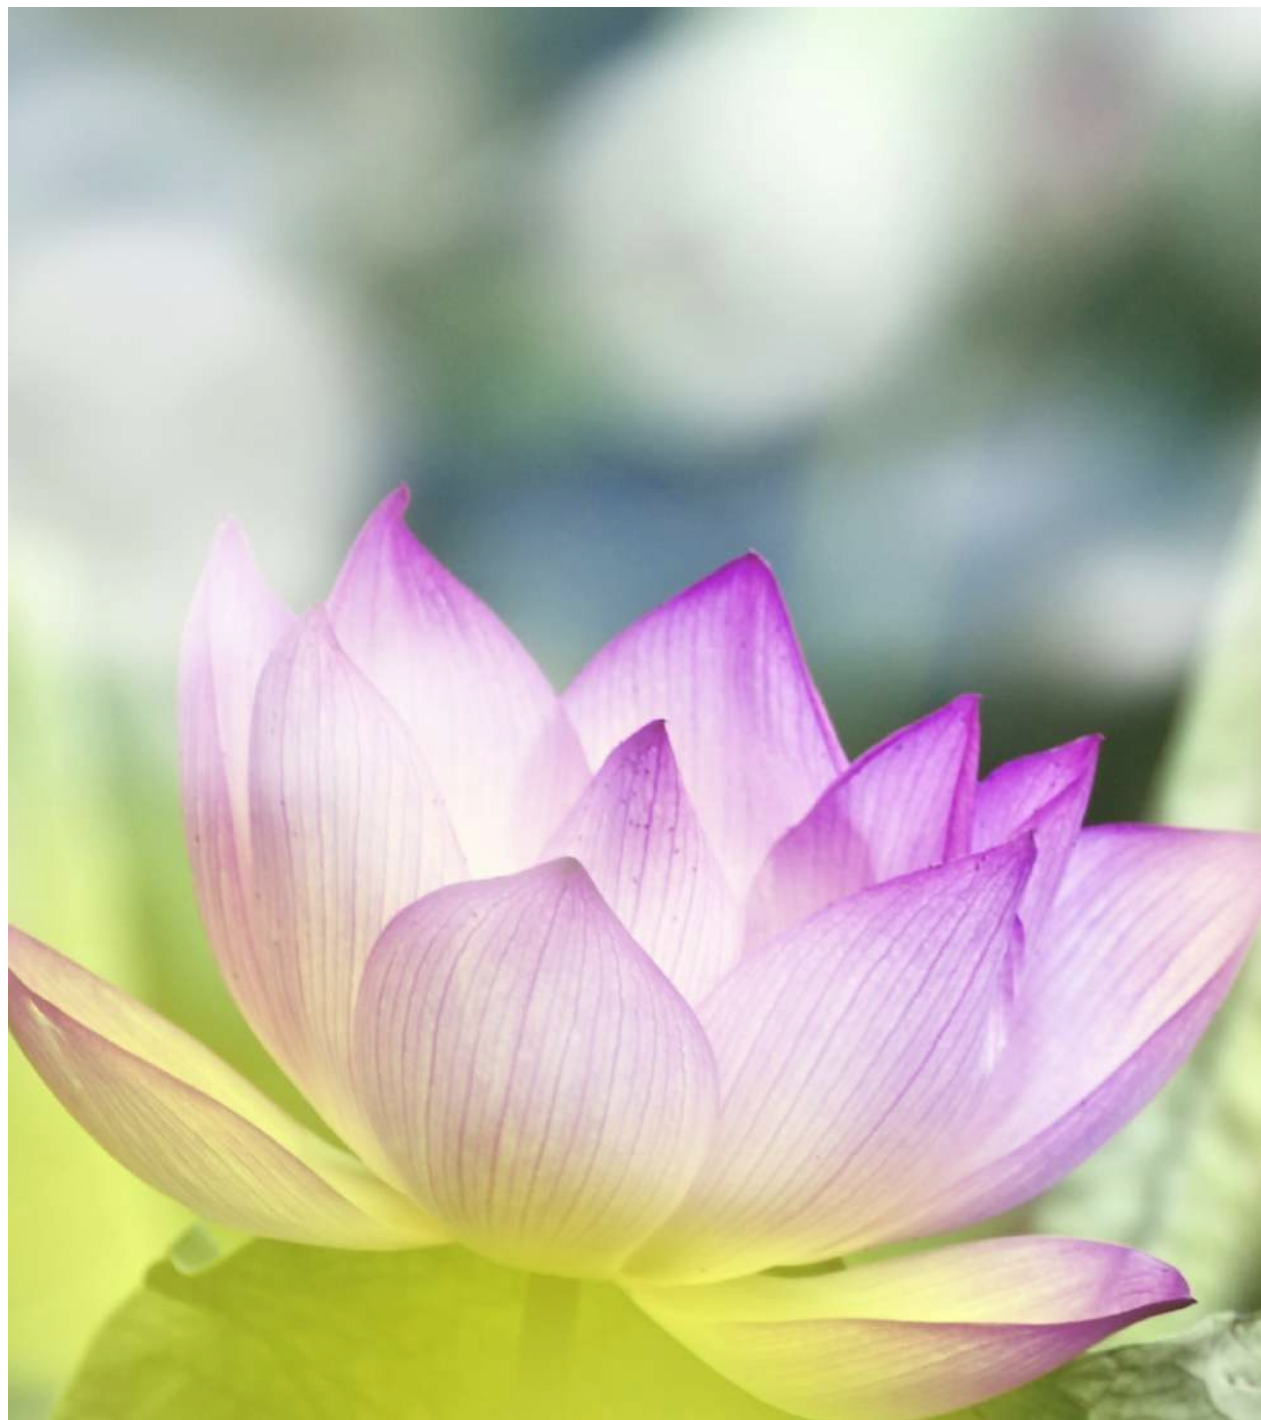

Palace Merano, well-being as a lifestyle

It has always been our goal to **help our clients achieve better well-being in every respect.** That is why we are always on the lookout for the latest techniques and technologies to offer.

At our facility clients can rely on a competent staff to guide them along their path, from beginning to end.

In this catalogue we present our entire offer in the field of aesthetic medicine; should you have any questions, we would be happy to answer them.

Embrace your transformation.

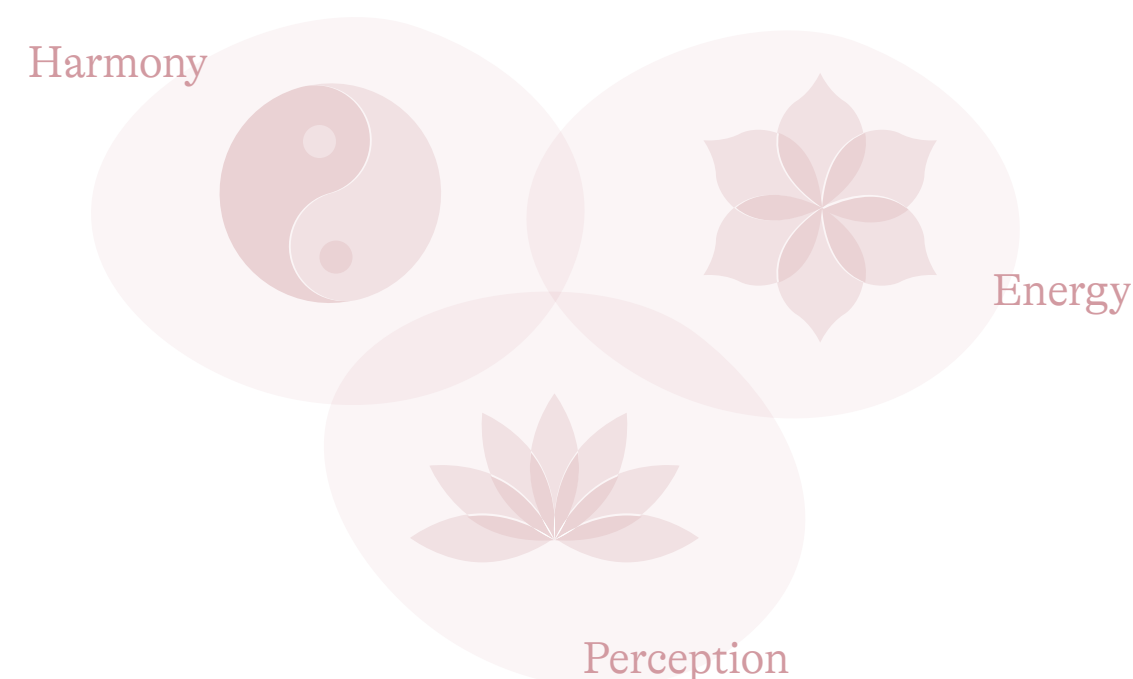

Regenerative Medical Aesthetics: the science of timeless beauty

At the heart of excellence and innovation, Regenerative Medicine Aesthetics is transformed into a sublime art, a journey in which science and beauty intertwine to awaken your most radiant essence. It is not just a treatment, but a rebirth: **a timeless luxury that renews, regenerates and sublimates every nuance of you.**

Ageing is written in the flow of life, but today science offers us the keys to slow it down, rewrite the history of skin and restore its original light. Here, at Palace Hotel Merano, aesthetic medicine is not limited to correcting, but also to awakening and enhancing the processes of cell regeneration, counteracting the signs of ageing from within.

The most advanced technologies – new-generation lasers, mesotherapy with growth factors, PRP (platelet-rich plasma), exosomes and stem cell treatments – work in perfect harmony with the body's natural mechanisms, stimulating the skin to regain its youthfulness and authentic radiance. Each treatment is a beauty ritual, the skin glows, the contours are redefined, the body regains tone and vigour. But the real transformation goes beyond the mirror: it is a new energy that is born within you, an aura of charm and well-being that accompanies you in every gesture.

Ancient Greek wisdom teaches us that 'Aisthesis', or 'perceiving', is the true meaning of aesthetics: **beauty is not only what we see, but what we feel, experience, radiate.** Let yourself be enveloped by the power of regeneration and discover a new era of boundless splendour.

Medical Check-up

An initial assessment with in-depth analysis of skin and body condition to identify specific needs; a discussion of aesthetic goals and identification of the most suitable treatment with assessment of general health; planning of customised aesthetic journey for best results.
Advice on skincare routine, indicating the best products to use to improve skin health and enhance the effectiveness of the treatments.

Regenerative Anti-aging Medicine

Rediscover your potential.

A revolutionary approach that combines advanced science and regenerative biology, to repair, renew and revitalise the body. Through treatments that stimulate the natural processes of cell regeneration, not only does regenerative medicine combat ageing, but it also restores vitality, energy and beauty.

ADVANCED TECHNOLOGY

Exosomes
SkinPen®
(The Regenerative Revolution
for Your Skin)
face / body

Exosomes are tiny natural vesicles produced by the cells in our body, rich in regenerating substances such as proteins, lipids and nucleic acids. These 'biological messengers' are able to stimulate cell regeneration and promote the repair of damaged tissue, with a powerful anti-inflammatory and antioxidant effect.

- Benefits:
- ✓ Global rejuvenation by combating signs of ageing, improving skin elasticity and firmness.
 - ✓ Treatment of blemishes with reduction of skin spots, expression lines, skin laxity and redness, as well as cellulite.
 - ✓ Acne scars and stretch marks by stimulating the production of collagen and elastin, thus smoothing and improving the skin's appearance.
 - ✓ Postpartum and post weight loss reshaping and toning, ideal for improving slack skin, circulation and leg toning, for a firmer, more toned body.

Complete face	€ 1.000,00
Extended body area	€ 1.000,00
Small face / body area	€ 500,00

LLLT
Low Level Light
System - Healite
face / body

Advanced regeneration for young, healthy skin. LLLT Healite is a non-invasive treatment that uses Low-Level Laser Therapy (LLLT) to stimulate the skin's regenerative processes. Thanks to advanced LED technology, it improves the production of collagen and elastin, accelerates tissue recovery and reduces inflammation and active acne, alleviates redness (rosacea) and provides visibly firmer and more radiant skin.

- Benefits:
- ✓ Stimulation of collagen production for a firmer, more radiant skin.
 - ✓ Reduction of redness, inflammation and symptoms of acne and rosacea.
 - ✓ Evening out of skin tone and improvement of skin texture.
 - ✓ Calming and soothing of sensitive or irritated skin.

INJECTABLES

Plasma
Regeneration
Therapy-PRP

face / body

Plasmalift PRP is an innovative treatment that uses the power of platelet-rich plasma (PRP), extracted from the client's own blood, to stimulate skin regeneration and promote cell renewal. This plasma, which is rich in growth factors, stimulates collagen production, improving elasticity, firmness and radiance of the skin. A small amount of blood is taken, separating the platelet-rich plasma and making targeted injections into the areas to be treated.

Benefits:

- ✓ Overall rejuvenation of the skin with reduction of wrinkles and signs of ageing.
- ✓ Improvement of texture with reduction of scars, stretch marks, blemishes and signs of acne.
- ✓ Natural lifting effect with toning of the skin.
- ✓ Brightness and vitality, makes the skin look fresher, healthier and more radiant.

Polynucleotides

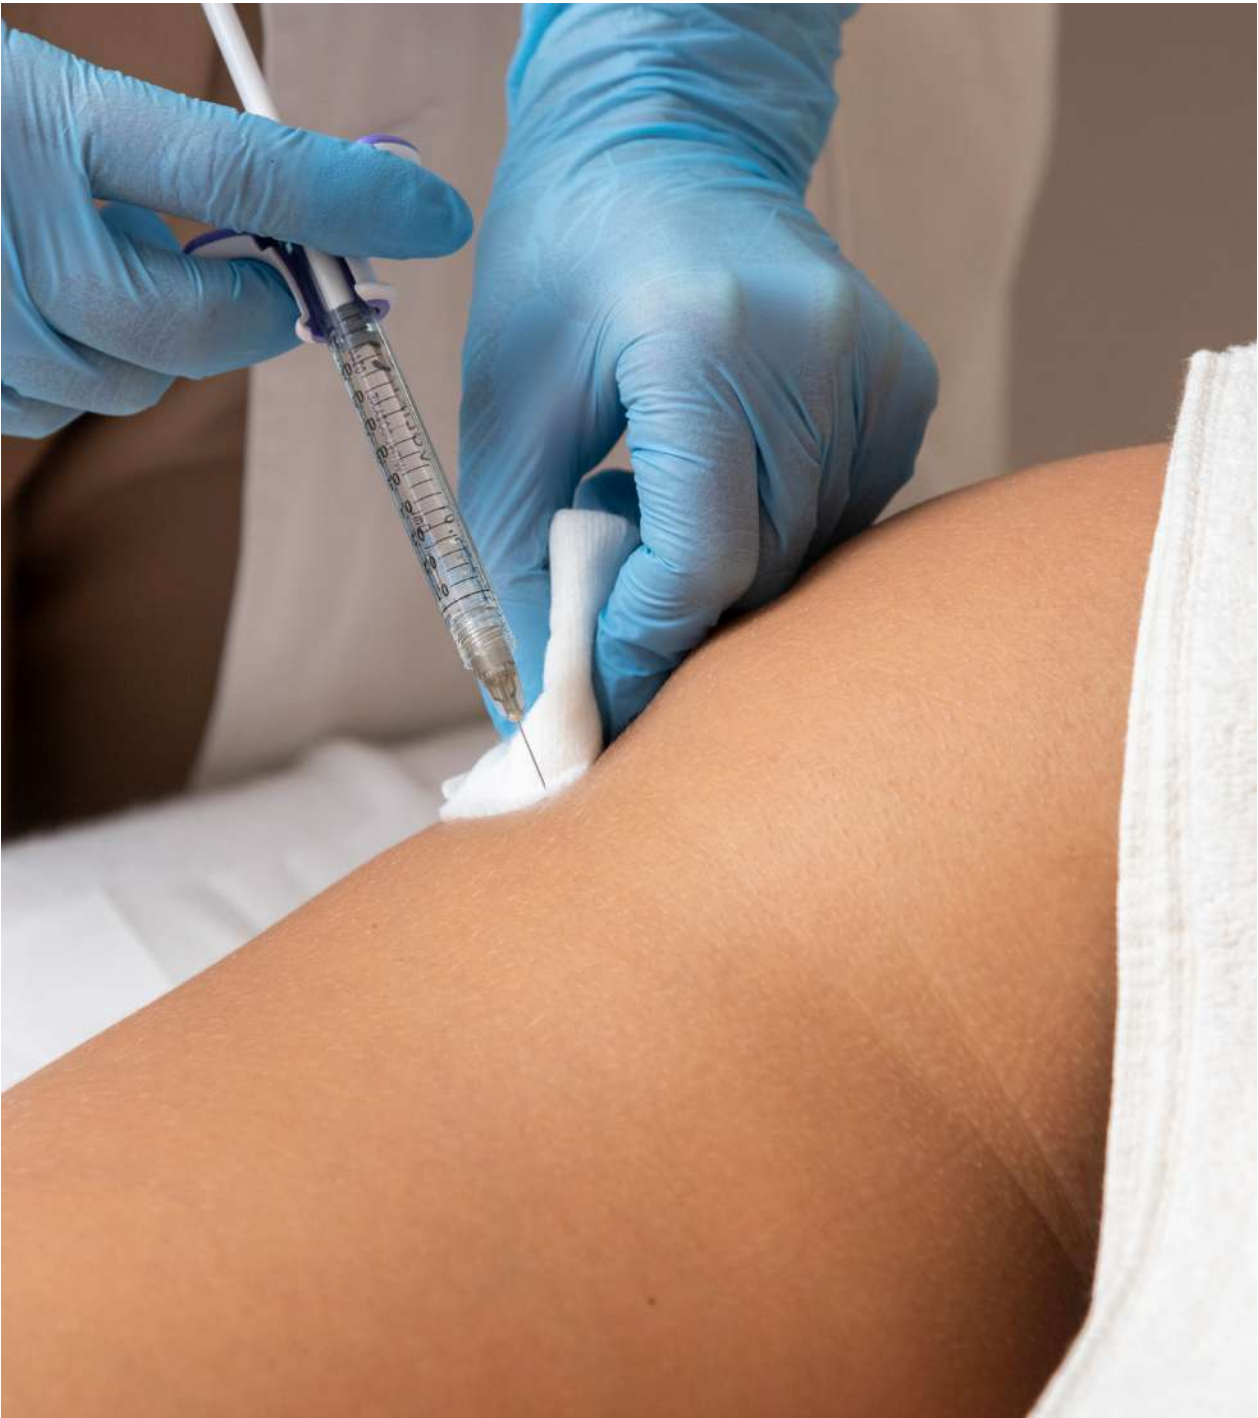

face / body

Polynucleotides are natural molecules from DNA and RNA that stimulate cell regeneration and promote tissue repair. At the heart of anti-ageing and regenerative treatments, they restore the skin's elasticity, tone and radiance.

Benefits:

- ✓ Stimulation of the production of collagen and elastin.
- ✓ Improvement of the skin's elasticity and firmness, providing a more youthful and toned appearance.
- ✓ Deep hydration by increasing water content in the skin.
- ✓ Cell regeneration and tissue repair.

Luxury Face and Body Contouring & Rejuvenation

Elegance and innovation for exclusive beauty.
Our customised approach with innovative technologies and state-of-the-art treatments aims to enhance natural beauty, sculpt the body and rejuvenate the face, offering visible results and a profound sense of well-being.

ADVANCED TECHNOLOGY

Ultraformer III

face / body

Treatment with HIFU (High Intensity Focused Ultrasound) technology represents a scientific revolution in non-invasive lifting and skin firming of the face and body. This cutting-edge technology works by heating tissues with targeted heat production, stimulating an immediate contraction of collagen fibres and a consequent complete lifting and reshaping effect.

- Benefits:
- ✓ Natural, non-invasive lifting for firmer, more toned skin.
 - ✓ Collagen stimulation for progressive rejuvenation.
 - ✓ Reduction of wrinkles and localised fat deposits.
